

Regulatory and Permitting Specialist, Iasi, Romania

SHAPING RENEWABLE TECHNOLOGIES OF TOMORROW

Blue Power Partners is a global consultancy and project development company with a dedicated focus on developing renewable energy.

We are expanding our development activities in Romania and looking for a talented colleague to come and join our team in Iasi.

You will join our onshore development team that is engaged in the development of onshore wind, solar, storage and PtX projects worldwide. The team spans a wide range of competencies and provides a huge scope of services such as due diligence projects, accelerator services, development management services like project management, supply chain & procurement, civil & electrical engineering, business case evaluations, etc.

About the job

In the role of Regulatory and Permitting Specialist, you will meet a great variety of tasks, and the right candidate shows a high level of resilience and perseverance combined with a natural curiosity and persistency.

Your accountabilities are likely to vary, but your main tasks may include:

- Provide support to on-going and new development projects focused on, but not limited to, permitting and regulatory needs
- Prepare, submit, and manage various types of permit applications
- Interpret current and future national as well as local regulations
- Participate in due diligence process
- Prepare client overviews of development status including risk investment
- Interface with client, government regulators, other contractors and representatives
- Visit client offices, attend regulatory agency meetings, attend public hearings, participate in field visits based on project requirements

Your primary work location is Iasi. However, dependent on project location, some travelling may be expected, which requires a flexible attitude from time to time.

About You

Being successful in this role, depends on your abilities of maneuvering in an agile and entrepreneurial environment where no two days are the same.

You are eager to provide high-quality deliverables and must have excellent interpersonal skills and a strong ability to communicate and navigate in a knowledge domain between technical and commercial topics.

We value the right match of personal and professional skills and would prefer you to enrich our business with the following proven experience and skills:

- Possess relevant education such as bachelor's degree in engineering, meteorology, environmental studies or a closely related discipline
- Minimum 3-5 years' experience – preferably from the development of energy projects
- Experience in interfacing with national and local authorities, municipalities and agencies
- Demonstrated experience in preparing and submitting compliance reports for water concession, environmental authorization, urban compatibility, etc.
- Demonstrated experience in obtaining relevant permits for chemical plants
- Expertise analyzing and interpreting prevailing regulations
- Strong interpersonal skills and ability to interact across multiple business units and stakeholders
- Successfully perform multiple tasks with strict deadlines
- Highly proficient English skills – written and verbal

As a person you are:

- Structured and analytic by nature
- Curious and driven by a steep learning curve
- Pro-active and a highly valued team worker
- Self-driven team player
- Hands-on and pragmatic
- Excellent to facilitate and present

Application and Contact

For additional information about this position, please contact Elena Buliga, Lead – Environmental & Permitting Department, at emb@bluepp.dk.

Your resume and application in English are submitted to emb@bluepp.dk

About Blue Power Partners

Blue Power Partners is supporting worldwide leading developers, asset owners and technology companies within origination, development, construction and performance optimization of onshore/offshore wind, solar, PtX and storage projects.

Working at Blue Power Partners means being part of a multi-cultural international company and working alongside people with a broad range of skills, from a variety of cultures. Our company is growing rapidly based on our strong company values, and we are committed to maintaining an agile environment with a strong can-do, dynamic and entrepreneurial spirit.

During the recruitment process, Blue Power Partners is processing all registered personal data in compliance with the European General Data Protection (GDPR), and we reserve the right to screen the SM accounts of potential candidates.
